

TABLE OF CONTENTS

Personnel	vi
Publications and Reports	xiv
Introduction	xviii

RADIO PHYSICS

I.	Molecular Beams	1
	Ammonia Maser with Separated Cavities	1
II.	Microwave Spectroscopy	3
	Cross Relaxation in Ruby	3
III.	Radio Astronomy	5
	Microwave Properties of the Atmosphere and Surface of Venus	5
	K-band Radiometry	9
IV.	Far Infrared Spectroscopy	11
	Dielectric Behavior of BaTiO ₃ Single Crystals in the Infrared Region	11
V.	Geophysics	15
	Perturbation of a Plasma by a Probe	15
	Plasma Diffusion in a Magnetic Field	15
	Level Crossing in Hg ¹⁹⁹	17
	Observations of the Aerosol Layer at 20 km	20
VI.	Physical Acoustics	23
	Investigation of Ultrasonic Coupling and Relaxation Effects at a Corona-Neutral Gas Interface	23
	Acoustic Radiation from Moving Point Multipoles	24
	Studies of Shock Structure	27
VII.	Electrodynamics of Moving Media	29
	Force Density in Polarizable Matter Obtained from the Principle of Virtual Work	29

PLASMA DYNAMICS

VIII.	Plasma Physics	35
	Further Observations of Anomalous Cyclotron Radiation in Xenon and Krypton	35
	Ion Confinement with Static and Rotating B Fields	40
	Effect of Gas Flow on a Spiral Instability in a Plasma Column	43
	Cyclotron Radiation of a Plasma Generated by an Electron Beam	44
	Cyclotron Radiation from an Electron Beam in a Mercury Discharge	50

CONTENTS

IX.	Plasma Electronics	57
	Beam-Plasma Discharges	57
	The Kitzeltron	57
	Observation of Long Confinement Times of Hot Electron Plasma in System C	58
	Radiofrequency Spectrum Radiated by Beam-Plasma Discharge	62
	Rotational Instability in the Beam-Plasma Discharge	65
	Beam-Excited Ion-Plasma Oscillations	70
	Electron-Cyclotron Resonance Discharge	72
	Wave Propagation in Hot Electron Plasmas	81
	Computer Analysis and Display of Wave Instabilities	85
	Fusion Reactor Blanket Experiment	87
	Model for Anomalous Radiation in Thomson-Scattering Experiments	98
	Field Configurations in the Stuffed Cusp	106
X.	Plasma Magnetohydrodynamics and Energy Conversion	109
	Free-Surface Waves Modified by a Magnetic Field	109
	Effect of Some Imperfections on Liquid-Metal Hydromagnetic Waveguide Performance	114
	Friction-Factor Measurements in Liquid-Metal Magnetohydrodynamic Channel Flows	121
	Dipole-Dipole Interactions between a Polarizable Particle and an Adsorbed Layer of Discrete Dipoles	126
COMMUNICATION SCIENCES AND ENGINEERING		
XI.	Statistical Communication Theory	131
	Systems of the Class Nonlinear No-Memory Followed by Linear with Memory	131
XII.	Process Analysis and Synthesis	135
	Rectangular Wave Generator	135
XIII.	Processing and Transmission of Information	141
	An Improved Low-Rate Error Bound for Fixed Time-Continuous Channels with Memory	141
	Laboratory Simulation of a Time-Variant Multipath Channel	147
	An Error Bound for Gaussian Signals in Gaussian Noise	149
	A Bound on the Distribution of Computation for Sequential Decoding — An Example	155
XIV.	Speech Communication	165
	Analysis of Formant Transitions for Consonants	165
	Note on Palatalization in Russian	167

CONTENTS

XV.	Linguistics	173
	On <u>NP wa NP ga Predicate</u> Constructions in Japanese	173
XVI.	Communications Biophysics	181
	Acoustics Stimulator for Use in Acute Experiments on Cats	181
	Binaural Unmasking and "Echolocation"	186
XVII.	Neurophysiology	189
	Machine Dependence of Degrees of Difficulty	189
	Some Results on Rabin's Probabilistic Automata	194
	Project Reports	197
	General Instrumentation	197
	Experimental Results	197
	General Considerations	202
	The Nature of Biological Membranes	204
	New Method for Testing Cameras and Lenses	209
XVIII.	Neurology	217
	Work Completed	217
	A Markov Analysis of Adaptive Tracking Behavior	217
	Visual Suppression during Voluntary Saccadic Eye Movements	217
	Visual Suppression during the Fast Phase of Vestibular Nystagmus	221
	The Scientific Translating System	223
	Dynamic Process Identification of Postural Control System	224
	Topical Corticosteroids and Pupil Diameter	227
XIX.	Cognitive Information Processing	231
	Perceived Order in Different Sense Modalities	231
	Electronic Combination Lock	232
	Mobility Aid Simulator	233
	Experiments on Machine Recognition of Connected Handwritten Words	235
XX.	Artificial Intelligence	239
	Stereoscopic Synthesis as a Technique for Localizing Visual Mechanisms	239
	Regularities in the Time Courses of Some Visual Processes	244
	Author Index	248
